Albert Einstein once revealed that 'I assert that the cosmic religious experience is the strongest and the noblest driving force behind the scientific research'. Most of the scientists say that there is an inspiration for the discoveries. Medical astrology is also a cosmic religious experience and a branch of astrology deals with Rasis, Stars, Planets causing illness and injuries which can be predicted in advance and thereby propitiative methods can be prescribed by the experienced Astrologer. This is also a kind of healing approach similar to curative systems like Ayurveda, Homeopathy, Naturopathy, Herbal Therapy, Aroma Therapy and Acupuncture etc., Every system has its own identity, pros and cons etc., After the incidence of Covid-19, the entire humanity is under panic about their safety and survival through modern scientific equipment presently available for the Diagnosis and Prognosis of the Disease. There is no assurance to guide the prescribed preventive methods to control the advancement of the disease. Science and spirituality make an art of partnership in search of cause and effect.

RAHUR NAVAMAMCHA SANI JANMA GURU TRUTEYE

12 KETU	1 SANI	2	3 GURU
11			4 BUDHA

If any one of yoga occurred as stated above in birth chart the native suffer from Balarishta. There are two varieties of Balarishtas. One is SadyoBalarishta. (if death occurred within 5 months from the date of birth); and another is Soumya Balarishta (if death occurred from 5th month to 12 years from the date of birth).

Balarishta Bhargas:

If birth place in Mesha Lagna – Balarishta took place as per planet/s posited in it. By Observing balarishta, the Astrologer has to investigate whether arishtabhanga yogas are there or not. Malefic influences on lagna, lagna lord, the Moon and the quadrant in different manner produce Balarishta. If there is a predominance of benefic influences; the afflictions disappear and get cancelled.

For Example: (1) Jupiter in Lagna-strengthen General health. (2) Jupiter in Cancer or in DhanuRasi and Meena Rasi in an angle or a kona. (3) Any of the strong Budha, Guru and Sukra in an angle, (4) Benefics are strong and malefics are weak. (5) Lagna and Moon are aspect by benefic etc., (6) having Gaja-kesariyogam.

After examining of all the above, even if there is balarishta, propitiative measures are to be advocated. The following remedies in-general can be performed.

- TilaDanam and AyushyaHoma to be performed.
- In critical stages, Mrutyumjayajapa and homa is to be performed.
- Some Anushtanas with sankalpa like recitation of Rama Raksha Shtotra, Vishnu sahasranamashtotra for which protect one can be under taken by parents to protect the child.

With a view to escape from evil effects, the father should resort to remedial measures mentioned below to promote the longevity of the child and for his protection. The father should arrange for the performance of religious rites prescribed by the incantations of mantras and offerings of oblations for the pouring ghee etc., in the Holi fire on every birth day of the child (according to the Lunar month) till the 12th year. This should be supplemented by appropriate medical treatment where-ever-necessary. (Phaladeepika Chapter 13-5th sloka).
