Abstract:

The 5th house is symbolic of the first conception or pregnancy. It also has to do with artistic talents, fancies, tastes and property derived through the wife or the luck of a business partner. The 5th house also denotes entertainment, recreation, sports, romance, amusements and other similar interests. The 5th house is the main house to see the blessing of a child in a horoscope. Other houses to be seen are the 2nd house (house for family) 11th house (house for gains and fulfilment of desires through children)

Key Words: Child Birth, Romancing, Beloved

1. Introduction:

Each house in your birth chart represents something different, and the 5th house is related to having children. If the 5th house is occupied by Jupiter, Venus, and the Moon, it means you're more likely to have kids. If there are planets like Raghur, Kethu, Mars, or the Sun, you may be less likely to have children.

**5th House and Prediction of Child Birth****How to Predict Child Birth from a Horoscope?**

- Calculating Your Birth Chart
- Predicting Conception and Birth
- Predicting Problems

Calculating Your Birth Chart:

Get the time, date, and location of your birth. When you make an astrological birth chart, it's important to be as specific as you possibly can. Figure out the exact time, date, and location of your birth, and then write that information down. You can usually find the date and time of your birth on your birth certificate. If you don't have it on hand, consider contacting your parents to ask for clarification.

For childbirth predictions, you typically want to get the birth chart of the person who will be pregnant and giving birth. However, you can also look at your partner's birth chart to check their fertility predictions.

Predicting Conception and Birth:

Look at the 5th house to determine the prospect of having children. Circular birth charts split everything up by house, so each piece of the circle will be labeled. Each house in your birth chart represents something different, and the 5th house is related to having children. If the 5th house is occupied by Jupiter, Venus, and the Moon, it means you're more likely to have kids. If there are planets like Raghur, Kethu, Mars, or the Sun, you may be less likely to have children. Check the sign of your 5th house to see how fruitful you will be. You can see which sign your house is by checking the outer ring of your birth chart. Typically, if your 5th house's sign is Scorpio, Pisces, or Cancer, you are more likely to have a lot of children. However, Virgo, Aries, and Leo are considered less fruitful signs. Examine the 7th, 8th, and 9th houses for sexual activity and health. If good planets, like Jupiter, Venus, and the Moon occupy these houses, there's a good chance that you will have a happy, healthy pregnancy and

birth. However, if they are occupied by Raghhu, Kethu, or Mars, there may be a lower chance of getting pregnant or having a positive childbirth experience.

Look for Jupiter multiple times in your birth chart for a better chance of pregnancy. In astrology, Jupiter represents growth, expansion, healing, prosperity, good fortune, and miracles. If you have Jupiter woven throughout your birth chart, there's a good chance that you will get pregnant or have your child soon. Predict your child's due date with the 5th and 9th house. If you're wondering when your baby is going to be born, check the 5th and 9th house of both parents. If Jupiter and/or Saturn are in the 5th and/or 9th houses, it means that your child will be born approximately 9 months from when you check your chart.

Predicting Problems:

Check your 10th, 7th, and 5th house to interpret any bad signs. Some astrologers say that if the Moon is in the 10th house, Jupiter is in the 7th house, and the 5th lord is not Jupiter, then your risk of miscarriage is higher than most. However, keep in mind that astrology cannot predict this accurately, and your pregnancy may be just fine. Look at your 5th house to see how your pregnancy will go. If your 5th house is ruled by Raghhu, Kethu, Mars, or Saturn, then astrologers say that you may have a tougher pregnancy or childbirth than most. These planets are considered to be full of malice, so many astrologers believe that they signify bad things to come. Watch for Saturn to anticipate any issues. Saturn is considered one of the worst planets in relation to childbirth. If you notice a strong Saturn, either in your 5th house or anywhere in your birth chart, astrologers say that you may have a higher chance of a stillbirth. Remember that astrology is not scientific, and only a doctor can tell you if you will have a stillbirth or not.

Analysis:

A child in a person's life is one of the most pleasant aspirations after marriage. Many get a child of their dream in time; many have to wait & struggle and some even remain childless. So can there be some fundamental reasons for the disparity between these sets of people? Yes, there are some fundamental reasons, and one can know about them all using Child astrology. And since Children involves high esteem of emotions, sometimes even non-believer in astrology tend to take help from Child Astrology. The overall child astrology can be distinguished into two parts: before and after the child birth. One can know the reasons for delay in child birth from a horoscope. For delay in child birth astrology, we review some specific houses in the horoscope and the position of specific planets in those houses in your horoscope. The 5th house is the main house to see the blessing of a child in a horoscope. Other houses to be seen are the 2nd house (house for family) 11th house (house for gains and fulfillment of desires through children). We also see the 9th house, though not that significant, as it works only as a facilitator. We have to see the position of the main planet Jupiter, the main significator for Progeny, along with that of Venus, Sun and Mars in couple's horoscopes. Sometimes, past life flawed Karmas and Nadi Dosha also attribute to delay in child birth. Most of such things can be seen when we match the horoscopes for marriage, but even if one has missed it at that stage, astrology can let you know all such reasons for the delay in child birth.

Child Gender Prediction in Astrology:

Astrology is such a depth Science that it can even tell you regarding the gender of the child. But this is not only unethical as per the basic rules of Vedic Astrology but illegal also so needs no further explanations. As parents, one can have the anxiety to get prediction for child gender, but the person giving such prediction is more to be blamed here. So, I dither when find people offering Chinese method or offering calculators for giving child gender prediction. And that is first where I said there are dark sides of child astrology.

Not Able to Have Natural Child:

The delay in childbirth can be due to circumstances or the planetary positions. But in some cases, the delay in starting the process can also result in complications in child birth. In today's time, too much focus on career or even personal likes and dislikes can also cause delay or deny childbirth in its natural process. In many such cases, couples, for whatever reasons, are not able to get blessed with their natural biological child and have to resort to methods like IVF. Here also, an expert astrologer can guide you with a proper guide map and schedule (like a perfect itinerary) when to plan IVF. Couples opting for such a measure must be doing it as a last resort; therefore, taking astrological guidance can make good sense here. One can know the best date for IVF according to birth chart. All explained till above relates to the subject of when and how to plan the child. What precautions one can and should take while planning a child. But what if none works and the couple have to adopt a child. Sometimes, there is no option but to go for child adoption.

Child Adoption in Your Horoscope:

Child adoption could be due to the failure of a couple to get their own child for whatever reasons explained above. But one should understand if the above factors played their role in denying a child to the couple, will adoption of child be a good decision? In astrology, if we focus on the 5th house to review the possibility of child birth, the same house is reviewed with a different angle to see if adopting a child will be a good option for you. Now once that you have a child, your own produced or an adopted child, you become parents. Then you become anxious to know about the future of the child. Now, this is a very tricky point that I will touch upon. I have used Natal chart information used are as below:

Conclusion:

Get a child's horoscope made, but for God's sake, please do not discuss it with an astrologer till the child attains the age of 12 years, unless there are sore health issues or absolutely abnormal behaviour. Else don't get surprised if you return to learning about many Doshas (blemish) in your child's horoscope. You may even be told that the child will always remain sick or bring hindrances in your life, or can even be a death threat to the family members. Once it happens, you stop behaving like good parents, start indulging in rituals and intervene in the Almighty's' natural process.
