**Abstract:**

Our ancestors calculated the rainfall with accuracy. By this help farmers do their works properly. water is the elixir of life. Sun takes water from earth and creates clouds. Then the water comes again to earth as rain.

**Key Words:** Rain Fall, Sun- Water, Earth, Clouds, Karpottam, Sun Entry In Arudra, First Day of Month

**Introduction:**

Our ancestors worshipped five elements water, fire, air, earth and sky as their god. They also afraid on them. The fire energy of Sun takes water from earth. With the help of air it comes as rain fall from the sky to earth.

**Karpottam:**

Sun entry to pooradam star in Sagittarius sign is called as karpottam. It stays is called as karpottam. It stags 14 days. We should watch every day in the above 14 days carefully. The first day Sun hidden by clouds after six months when the Sun will enter in Arudra star it will be a heavy rain for that 14 days

- The second day Sun hidden by clouds after six months when the Sun will enter in Punarvasu star it will be a heavy rain for that 14 days
- The third day Sun hidden by clouds after six months when the Sun will enter in Poosam star it will be a heavy rain for that 14 days
- The Fourth day Sun hidden by clouds after six months when the Sun will enter in Ayilyam star it will be a heavy rain for that 14 days
- The Fifth day Sun hidden by clouds after six months when the Sun will enter in Magam star it will be a heavy rain for that 14 days
- The Sixth day Sun hidden by clouds after six months when the Sun will enter in Pooram star it will be a heavy rain for that 14 days
- The Seventh day Sun hidden by clouds after six months when the Sun will enter in Uthiram star it will be a heavy rain for that 14 days
- The Eighth day Sun hidden by clouds after six months when the Sun will enter in Hastham star it will be a heavy rain for that 14 days
- The Ninth day Sun hidden by clouds after six months when the Sun will enter in Chitra star it will be a heavy rain for that 14 days
- The Tenth day Sun hidden by clouds after six months when the Sun will enter in Swathi star it will be a heavy rain for that 14 days
- The Eleventh day Sun hidden by clouds after six months when the Sun will enter in Visagam star it will be a heavy rain for that 14 days
- The Twelveth day Sun hidden by clouds after six months when the Sun will enter in Anusam star it will be a heavy rain for that 14 days
- The Thirteenth day Sun hidden by clouds after six months when the Sun will enter in Jyeshtha star it will be a heavy rain for that 14 days

The Fourteenth day Sun hidden by clouds after six months when the Sun will enter in Moolam star it will be a heavy rain for that 14 days

**During Karpottam Which Should be Watched?**

During Karpottam. We should watched the following five items carefully. 1. Wind, 2. Rain, 3. Thunder, 4. Flash, 5. Clouds

- Wind: In the month of Margazhi if we feel the cool breeze . We will expect good rain after 195 days.
- Rain: Generally no rain in the month of Margazhi. But it rained we expect good rain after 195 days.
- Thunder: In the month of Margazhi if we heard the thunder. There will be a heavy rain after 195 days.
- Flash: In the month of Margazhi if we see the flash there will be heavy rain after 195 days.
- Clouds: In the month of Margazhi if we see clouds in the sky. There will be a heavy rain after 195 days.

**Kinds of Clouds:**

There are nine types of clouds.

- |                  |                       |
|------------------|-----------------------|
| 1. Thama Cloud   | 2. Vayu Cloud         |
| 3. Varuna Cloud  | 4. Neela Cloud        |
| 5. Kaala Cloud   | 6. Throna Cloud       |
| 7. Puskara Cloud | 8. Sangu Vartha Cloud |
| 9. Avartha Cloud |                       |

**How we Calculate the Type of Clouds?**

We should multiply the salivagana sagaptha for the particular year into eight and divided into nine the answer is.

- |                |   |                                   |
|----------------|---|-----------------------------------|
| 1. Avartha     | – | Small rain                        |
| 2. Sanguvartha | – | Cyclone                           |
| 3. Puskara     | – | Heavy rain                        |
| 4. Throna      | – | Heavy flood                       |
| 5. Kaala       | – | Rain with air                     |
| 6. Neela       | – | Some places rain, some places dry |
| 7. Varuna      | – | Heavy rain                        |
| 8. Vayu        | – | No rain                           |
| 9. Thamo       | – | Good rain                         |

**Cloud Producing Direction:**

- The megathipathi of the year is,
- Sun, the cloud is producing from the direction east.
- Moon, the cloud is producing from the direction North West
- Jupiter, the cloud is producing from the direction north east
- Mars, the cloud is producing from the direction south
- Venus, the cloud is producing from the direction south east
- Mercury, the cloud is producing from the direction north
- Saturn, the cloud is producing from the direction west

**Star of the first day of every month:**

The first day of Tamil month's star is Arudra, Punarvasu, Hastham, Chitra, Pooradam, Uthradam, Uthratathi there is no rain. The first day of Tamil month's star is Aswathi, Bharani, Karthiga, Rohini, Mrigasira, Poosam, Ayilyam, Magam, Pooram, Uthram, Swathi, Visagam, Anuradha, Jyeshta, Moolam, Sravanam, Danishta, Sathbiksha, Pooratathi, Revathi there is heavy rain.

**Sun Entry in Arudra and Rain:**

Arudra is star of Rahu. Its athi devatha is Lord shiva. Prathyathi devatha is Lord Rudran So, we can easily calculate the rain fall through the day when Sun enters in Arudra.

- The day of the Sun's entry in Arudra star is Sunday there is no rain.
- The day of the Sun's entry in Arudra star is Monday there is normal rain.
- The day of the Sun's entry in Arudra star is Tuesday there is damages by cyclone
- The day of the Sun's entry in Arudra star is Wednesday there is heavy rain with storm
- The day of the Sun's entry in Arudra star is Thursday there is good rain
- The day of the Sun's entry in Arudra star is Friday there is better rain
- The day of the Sun's entry in Arudra star is Saturday there is delayed rain

**Arudra Star and Rain:**

- Arudra with Thithi: Arudra Conjunctions with chathurthi, Ashtami and Navami there is no rain.
- Arudra with Yogam: Arudra conjunction with Athikandam, Soolam, Kandam, Thruvam, Vyagatham, Vyathi batham, Bramyam, Magendram, Vythruthi, there is no rain.
- Arudra with Karana: Arudra Conjunctions with Vishti, Saguni, Sathushpatham, Nagavam, Kimsthuknam there is no rain.

**Arudra with Sun Entry Lagna:**

- Taurus, Cancer, Libra, Pisces – Heavy rain
- Virgo – Cyclone
- Aries, Gemini, Leo, Scorpio – No Rain
- Sagittarius, Capricorn, Aquaris – No Rain

**Chitra Month Firstday and Rain:**

If the first day of chitra month falls on Sunday there is no rain  
 If the first day of chitra month falls on Monday there is normal rain  
 If the first day of chitra month falls on Tuesday there is no rain  
 If the first day of chitra month falls on Wednesday there is cyclone  
 If the first day of chitra month falls on Thursday there is medium rain  
 If the first day of chitra month falls on Friday there is good rain  
 If the first day of chitra month falls on Saturday there is little rain

### **Rain According to Vaikasi Month Prathamai Thithi:**

The vaikasi month Prathamai thithi falls on day decides the status of the wind and rain.  
If the vaikasi month Prathamai thithi falls on Sunday, less rain and the wind will be heat.  
If the vaikasi month Prathamai thithi falls on Monday, excellent rain  
If the vaikasi month Prathamai thithi falls on Tuesday- no rain, wind like fire  
If the vaikasi month Prathamai thithi falls on Wednesday – cyclone and normal rain  
If the vaikasi month Prathamai thithi falls on Thursday – mild wind and normal rain  
If the vaikasi month Prathamai thithi falls on Friday – cooling breeze and good rain  
If the vaikasi month Prathamai thithi falls on Saturday – no rain and heat wind

### **Ashada Sutha Panjami:**

In the month of Aani (Gemini) Sukla Paksha Panjami decides the rain fall level.  
If the Ashada sutha panjami falls on Sunday, there is no rain.  
If the Ashada sutha panjami falls on Monday, there is heavy rain.  
If the Ashada sutha panjami falls on Tuesday, war would come  
If the Ashada sutha panjami falls on Wednesday, cyclone would come  
If the Ashada sutha panjami falls on Thursday, prosperity would come  
If the Ashada sutha panjami falls on Friday, heavy flood would come  
If the Ashada sutha panjami falls on Saturday- Shortage of food would come

### **Ashada Sutha Panjami Star:**

If the Ashada Sutha Panjami Star falls on Hastham – people are happy, good yield in agriculture.  
If the Ashada Sutha Panjami Star falls on Chitra – agriculture worst  
If the Ashada Sutha Panjami Star falls on Swathi – no rain

### **Conclusion:**

Our Saints, Rishis, Siddhars had given us the rainfall astrology clearly. We should use this to prevent us from cyclone, storm, tempest and flood.
